# User assistance for StruxureWare Data Center Expert 7.x

The most recent Data Center Expert release is v7.7.1. It contains an updated installer for 64 bit operating systems including RHEL 6.0 and CentOS 6, improved performance in the installed client, and improvements to saved reports and alarm resolution in the web client. You can update Data Center Expert v7.7.0 to Data Center Expert v7.7.1. You must contact your local Technical Support and verify you have a valid software support contract to receive the StruxureWare Data Center Expert v.7.7.1 update file.

**NOTE:** The StruxureWare Data Center Expert v7.7.1 update file is not available for download on this site.
